

Should all health and care organisations across London follow the recommendations we have developed today (data use for planning and in research), or should they each have the power to make their own decisions about how to use their patients' data?

Vote
Now

1. We expect there to be a single set of policies ('rules of the road') across all health and care organisations in London
2. We expect the policies ('rules of the road') to be set at the level of the 5 sub-regional areas in London
3. We expect organisations to make their own policies ('rules of the road') around information sharing

To what extent do you agree or disagree with the following statement....

Vote
Now

"We expect all health and care organisations in London to join-up identifiable information to support the provision of care to individuals, with staff seeing information relevant to their roles through some sort of role-based access control?"

1. Strongly agree
2. Agree
3. Disagree
4. Strongly disagree

To what extent do you agree or disagree with the following statement....

"We expect all health and care organisations in London join-up de-personalised information, as part of a population dataset, to support proactive care, planning and research & development?"
