

LONDON CARE RECORD

Supporting safe and effective care across the Capital and beyond

The **London Care Record** gives you, and other health and care professionals, instant access to the information you need about a person at the point of care.

It is an up-to-date record of their information over time and across different parts of the NHS and social care helping you provide the best possible care. It can also save you valuable time.

- ✓ Helps avoid duplicated or unnecessary tests and referrals
- ✓ Supports triage and assessment thanks to more complete information
- ✓ Better joined-up care across different teams and different organisations
- ✓ More time spent with patients rather than chasing information

Each month around 100,000 health and care staff use the **London Care Record**.

Find out more [HERE](#) about how the **London Care Record** can help you.
